RE-PERFORMANCE & RESTATEMENT MEMORANDUM

Valuation date: **June 30, 2026** · NAV run of record issued 2026-09-30 · re-performed 2026-09-30**Difference below the restatement threshold**

The fund's corrected files move net asset value at 2026-06-30 from \$8,037,746.15 to \$8,030,578.26, a difference of - \$7,167.89 (8.9 bps); the largest movement at any valuation date in the run is 8.9 bps, against a threshold of 50.0 bps of NAV. The threshold is not exceeded, so no investor compensation arises from the NAV movement itself. The restated pack and statements are still issued, because the capital accounts below have changed. **Separately, 1 redemption(s) already settled in cash at the superseded NAV (see the redemption section below). That cash moved at the wrong price regardless of the threshold above.**

Each investor's incentive fee is recomputed against that investor's own high-water mark on the restated figures. A restatement that lowers capital below an investor's mark takes the fee back off, it does not leave a fee charged on a gain that no longer exists.

Net cash to settle with redeeming investors

-\$100.83

Cash has already left the fund at the superseded price. The restated figures pay \$100.83 less than was settled. The excess was paid out of the remaining investors' capital and is recoverable from the redeeming investor(s). Settlement is a GP decision; this administrator states the amount and does not net it against future subscriptions on its own authority.

6 • INGEST EXCEPTIONS

Prepared by Attest as independent administrator to Northfield Digital Opportunities Fund LP. This memorandum re-performs a prior NAV run from the input files of record, identified above by SHA-256, and reports every difference the re-run produces. The administrator applies the fund's board-approved marking and FX policies and does not originate an underlying price; where a corrected mark moves the NAV, the correction originates with the fund or its pricing

source, not with this administrator. Settlement of any cash difference is a decision of the general partner. Threshold applied: 50.0 bps of net asset value. Figures are unaudited and subject to the fund's annual audit.
